CBR1000RR-R / CBR1000RR-R SP

The CBR900RR Fireblade that started all.

THE BLADE THAT CHANGED HOW BIKES WERE BUILT.

Aiming to create a high-performance motorcycle that could defeat its own RVF750 in Endurance Road Races, Honda developed an R&D project that led directly to the CBR900RR in 1992. With 128 HP, it was not the most powerful of its time. However, thanks to a dry weight of 185 kg when all rivals were well over 200 kg, the first Fireblade, soon nicknamed “Blade” by the fans, was so easy to control that it seemed to read its rider’s mind.

More than 25 years after, the most powerful and nimble Honda bikes keep carrying the Blade legacy.
